Acknowledgements	ii
Table of Contents	iii
List of Tables	xii
List of Figures.....	xv
Chapter 1: Rationale.....	1
Statement of the Problem.....	1
Standards-based Curricula	1
Block Scheduling.....	2
Possible Synergies Between a Standards-based Curriculum and a Semestered Block Schedule.....	7
Research Questions.....	8
Primary Research Questions	9
Secondary Research Questions	10
Overview of Method	11
Research Opportunity at Suburban High School	11
Testing the Traditional cohort.....	12
Testing the Pilot cohort.	13
Testing the first reform cohort.	13

Testing the second reform cohort.	14
Data Analyzed.....	14
Analysis of Algebra Achievement tests.	15
Transcript analysis.	15
Document analysis.	15
Key informants.	15
Definition of Key Terms	16
Chapter 2: Review of the Literature	19
Semestered (4x4) Block Scheduling.....	20
Effects of Semestered Block Scheduling on Mathematics Instruction.....	21
Reduced effectiveness of lecturing.	21
Decreased breadth and increased depth of coverage.	23
Need to adjust the mathematics curriculum.	24
Advanced placement classes.....	26
Impact of student absences.	28
Retention of learning after a gap in sequential instruction.	28
Effects of Semestered Block Scheduling on Mathematics Achievement.....	33
Student grades.	33
Mathematics test scores: Canadian studies.....	34
Mathematics test scores: United States studies.....	39
Interaction of Semestered Block Schedule with Curriculum.....	44
Interaction of Semestered Block Schedule with Teaching Methods	45

The Interactive Mathematics Program (IMP)	49
IMP Synergies With a Semestered Block Schedule	50
IMP Connections to Learning Theory	54
Critiques of the IMP Curriculum	55
Wu’s detailed review and critique of the IMP curriculum.	56
Critiques of constructivism and situated cognition.....	59
Studies of Achievement under IMP and other Reform Mathematics Curricula.....	66
Studies of achievement under IMP’s sister curricula.	67
Studies of achievement under IMP.....	78
Chapter 3: Method	86
Participating Students	87
Participating Teachers	88
Professional Development	89
Planning Time.....	89
Traditional Schedule	89
Traditional Curriculum	90
Reform Cohorts	91
The Semestered Block Schedule.....	91
The IMP Curriculum.....	92
Schedule and Curriculum: Summary	97

Data Collection	100
Algebra Achievement Test	100
Testing in the spring of 1997: Traditional cohort.....	102
Pilot Testing in the spring of 1999.....	102
Testing in the spring of 2000: First Reform cohort.....	103
Testing in the spring of 2001: Second Reform cohort.....	104
Scoring procedures.....	104
Student Test Scores for Grade 6	107
Transcripts.....	108
Documents	108
Key Informants	109
Data Analysis: Eleventh Grade Algebra Tests.....	109
Covariate: Sixth Grade Test Scores	109
Dependent Variables.....	114
Test reliability.....	116
Statistical Methodology: Rules for Establishing Confidence Intervals.....	116
Statistical Models Used.....	117
Supplemental Analyses of Specific Skills	118
Data Analysis: Student Transcripts	119
Groups to be Compared	122
Statistical Methodology	123
Data Analysis: Documents and Key Informants.....	124

Summary of Method.....	125
Chapter 4: Results.....	127
Algebra Achievement at the End of Eleventh Grade	127
Results from Test 1: Understanding and Solving Algebra Problems presented in Context.....	128
Test 1 results without controlling for prior ability.....	129
Test 1 results after controlling for prior ability.....	131
Results from Test 2: Algebraic Symbol Manipulation	133
Test 2 results without controlling for prior ability.....	134
Test 2 results after controlling for prior ability.	136
Results from Test 3: Pairs of Students Solving an Extended Applied Algebra Problem	137
Test 3 results without controlling for prior ability.....	140
Test 3 results after controlling for prior ability.....	143
Eliminating two alternate explanations for Test 3 results.....	148
Test 3: Analysis of interaction for pairs with two Grade 6 ability estimates.....	150
Test 3: Opposite interaction pattern for pairs with one Grade 6 ability estimate. ...	155
Test 3 interactions: A possible interpretation.	156
Specific Effects of Traditional Curriculum/Schedule and IMP Curriculum/Block Schedule.....	160
Evaluating expressions.....	161
Simplifying expressions.....	164

Solving linear equations.....	166
Solving quadratic equations.....	168
Representational fluency: translating the graph of a line to an equation.....	178
Representational fluency: Non-procedural tasks.	184
Formulation and interpretation of mathematical models.....	189
Summary of detailed differences between groups.....	193
Effects of Measuring Achievement the end of Grade 11 Instead of at Other Possible	
Measurement Times.....	194
Possible underestimate of algebra achievement for those students not currently enrolled in mathematics.	195
Unmeasured effects of twelfth-grade coursework.	196
Transcript Analysis.....	199
Results from Analysis of Complete High School Transcripts	199
Comparison of total hours enrolled in mathematics class.	201
Comparison of hours enrolled in advanced mathematics classes.	206
Advanced Placement Courses.....	214
AP Course Enrollment	215
AP Exam Grades.....	219
Chapter 5: Summary and Conclusions.....	226
Summary of Results on the Algebra Achievement Test.....	226
Summary of Results from the Transcript Analysis	231

Summary of Results Regarding Advanced Placement Courses	232
Interaction of the Semestered Block Schedule and IMP Curriculum	233
Limitations: Threats to Internal Validity	236
Threats to Internal Validity Attributable to Non-Random Group Assignment.	236
Other Threats to Internal Validity	237
Some Strengths of the Research Design.....	240
The Nature of the Implementation at Suburban High School.....	241
Interaction of Community and Schedule	242
Planning Time and Professional Development.....	244
Modifications to the IMP Curriculum.....	245
Visual Mathematics	248
A Strong Grass Roots Leader	249
Unusually Strong Mathematics Teachers	250
Collegial Mathematics Department	251
Time to Prepare for the Change	251
Elements of Community Support.....	252
Use of Multiple Measures	252
Synergy of IMP and the Semestered Block Schedule	253
Future Research	258
References.....	260

Appendix A: Core-Plus Algebra Test Forms Used In This Study.....	274
Part 1: Understanding and Solving Algebra Problems in Context	275
Part 2: Symbol Manipulation	277
Part 3: Extended, Applied Algebra Problem	290
Appendix B: Scoring Rubrics	295
Guiding Principles for Scoring Exams.....	296
Rubric for Part 1	317
Rubric for Part 2.....	326
Rubric for Part 3.....	328
Appendix C: Sample Anchor Papers	334
Sample Anchor Papers for Part 1, Problem 3.3.....	336
Sample Anchor Papers for Part 2, Question 10	353
Sample Anchor Papers for Part 3.....	369
Appendix D: Sample Practice Papers	382
Key for Practice Set A, Part 1, Question 3	383
Practice Set A for Part 1, Question 3.3	Error! Bookmark not defined.

Key for Practice Set A, Part 2.....	392
Practice Set A for Part 2, Question 10	393
Key for Practice Set A, Part 3.....	399
Five Sample Student Papers from Practice Set A, Part 3	401
Appendix E: Detailed Description of IMP Modules	407
Appendix F: Methodology for Rasch Analysis and Multiple Imputation	421
Multiple Imputation.....	424
The Rasch Model.....	427
References Used in Appendix F	432
